Ultra-Luxury Antarctica 2024-2025

2 | Seabourn Expedition voyages offer adventurous travellers unforgettable journeys to some of the world's most remote, awe-inspiring locales. They'll explore places few people will ever see - in a style never imagined.

They'll follow in the wake of daring explorers and discover the wonders of Antarctica, one of the most remote and beautiful places on Earth in unparalleled comfort and luxury. Sailing on Seabourn's ultra-luxury PC6-class expedition ships, Seabourn Venture and Seabourn Pursuit, they'll navigate waters few ever see at the extreme southern end of the world, with leisurely days of spectacular scenic cruising punctuated by thrilling adventures ashore.

The view is constantly changing – Gigantic fjords sparkling with unnamed glaciers, wildlife in amazing abundance from tiny krill to majestic blue whales, comical penguins to huge elephant seals.

Each Expedition voyage is staffed with a knowledgeable, world-class 24-person team of scientists, scholars, historians, naturalists and more, who will share their expertise and operate activities, give talks and provide guests with insight into the wonders around them.

There's still some limited space on select winter 2024 to 2025 Antarctica Voyages, and if you book by 3 September 2024, there's an included air credit of up to £1,600 per suite.

As well as the Seabourn all-inclusive difference, our Antarctica voyage offers all the following exclusive amenities and activities designed to enhance every moment:

- Complimentary landings and Zodiac® scenic tours in Antarctica, with optional** kayak and submarine excursions that enable travellers to witness pristine landscapes, towering icebergs and abundant wildlife at sea level and below — conditions permitting.
- Digital photography presentations
- Complimentary Seabourn parka and backpack
- Opportunities for frequent wildlife sightings from the ship and on shore
- Guidance from our world-class Expedition Team, which includes marine biologists, naturalists, kayak guides, wildlife experts, and a glaciologist.
- Inspiring Seabourn Conversations® from an onboard Expedition Team
